Manas Milind More

Software Engineer

+91 9819408292 | manasmore05@gmail.com | linkedin.com/in/manasmore23 | github.com/manas-2005

Summary

Software Engineer specializing in **backend development, API design, and process automation**, with hands-on experience architecting **Python and n8n-driven data workflows** that **cut turnaround time by 95%** and **eliminated weeks of manual effort** through scalable, event-driven systems.

Technical Skills

Programming Languages: Python, C++, Java, JavaScript
Frameworks & Libraries: React.js, React Native, Express.js, FastAPI
Database: MongoDB, MySQL, PostgreSQL, Firebase, Supabase
Backend & APIs: REST API Design, WebSockets, Authentication, Workflow Automation
Developer Tools & Platforms: VS Code, Git, GitHub, Postman, n8n, Google Colab, AWS

Experience

LetsUpgrade – Software Developer Intern, Automation Engineer JUNE 2025 – JULY 2026

- Streamlined the internal content-creation process by developing **Python scripts and scheduled jobs**, reducing turnaround time from **48 hours to 2 hours (a 95% reduction)**.
- Collaborated on the design and development of an **LMS (Learning Management System) tool**, successfully **integrated and deployed across multiple companies**.
- Designed and implemented an **AI-driven content generation workflow using n8n**, reducing tasks that previously took **weeks** to a fraction of the time by removing manual intervention.

Projects

ShieldAI | *React Native (Expo), FastAPI, PostgreSQL (Supabase), Python* 2025

- Built an **AI-powered fraud protection app** for Android that scans UPI IDs, QR codes, phone numbers, and links using a **multi-stage detection engine** (behavior analysis → rule engine → machine learning model → risk scoring → decision).
- Engineered a **FastAPI backend** with Supabase (PostgreSQL, Authentication, Storage) to handle user authentication, real-time SMS-based scam detection, and **WebSocket-driven** live fraud alerts.

YouTube AI Narrator | *Python, OpenAI Whisper* 2025

- Built a tool that enriches educational YouTube videos by **downloading, transcribing, and segmenting** them into logical concepts, then inserting **AI-generated spoken explanations** between segments.
- Designed a **modular, extensible architecture** (download → transcribe → segment → explain → synthesize → combine) with configurable Whisper model sizes and CLI options for output control.

Education

ITM Skills University Aug. 2023 – May. 2027
Bachelor of Technology in Computer Science

Thakur College of Science and Commerce Aug. 2021 – Mar. 2023
Higher Secondary Education

Others

Languages: English, Hindi, Marathi
Soft Skills: Problem Solving, Team Collaboration, Analytical Thinking
Achievements: 1x Business Pitch Competition Winner, 2x Hackathon Finalist, 1x Hackathon Winner
Certifications: AWS Cloud Practitioner Essentials
